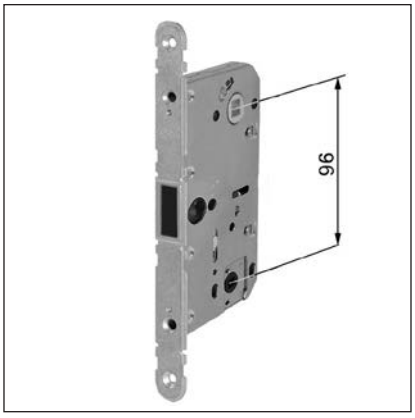
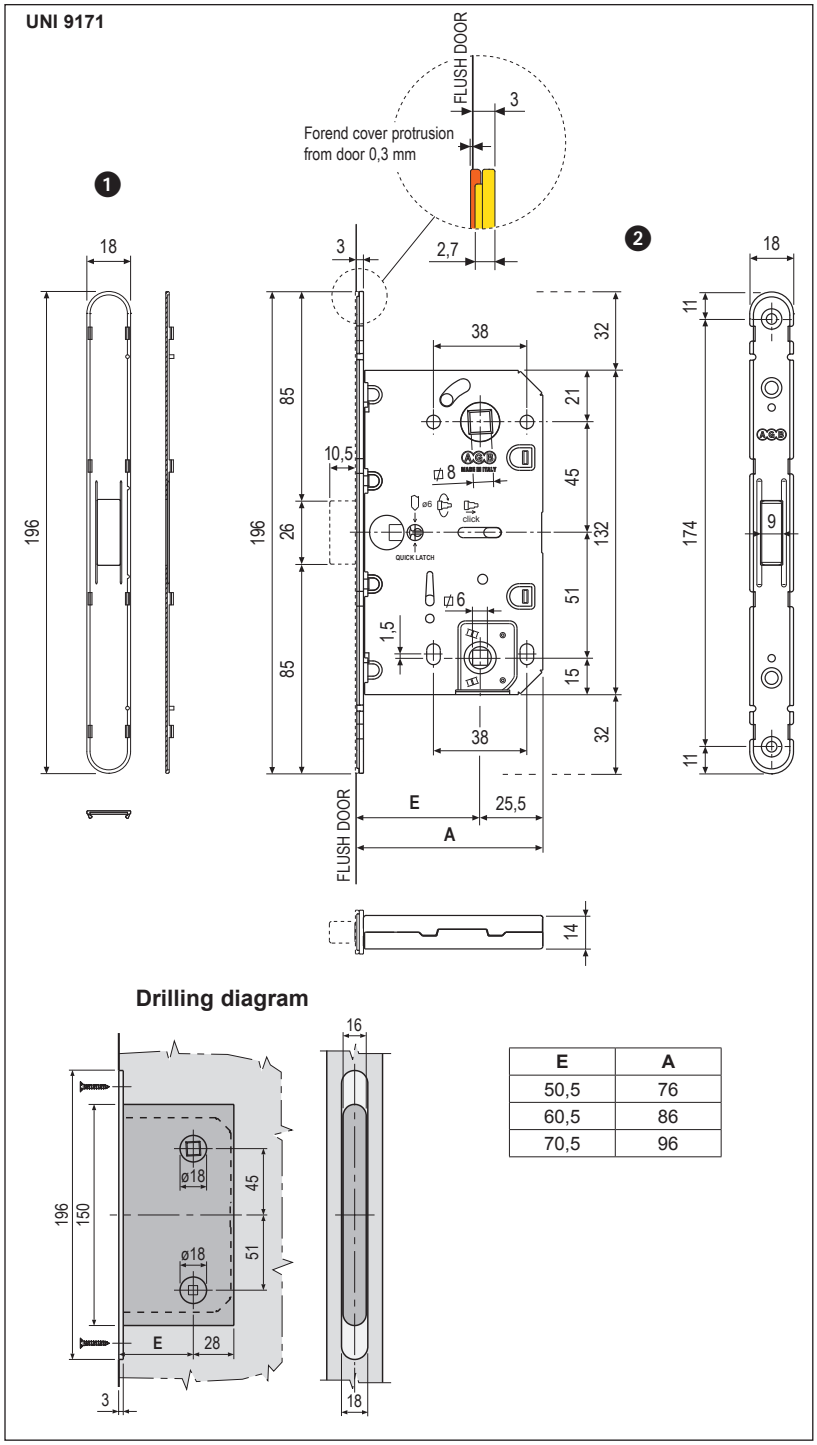
Revolution XT bathroom lock, 96 mm centre, 18 mm forend



WC



E	A
50,5	76
60,5	86
70,5	96

Description

Magnetic flush-mounted lock with central latch in plastic material.
The bathroom lock blocks the latch also functioning as bolt but leaving the handle free to go down.
The lock features no protuberances on the forend, thanks to the latch which is entirely retracted into the casing. Steel front (18 mm) with rounded edge, 50,5, 60,5 and 70,5 mm backset. 96 mm centre. 6 mm knob. Steel lockcase with through screw-holes for handle assembly.

Note. *The bathroom lock can't make the latch come in. To open the sash, it is necessary the handle assemby.*

Application

The symmetrical, magnetic latch makes the lock right/ left handed.

Mounting

Cut a slot and include a milled component on the panel (dimensions in drawing). Fix the lock with two screws (3,5x20 mm).

Note. *Neutral coating of the forend cover (B01120.00.01) can be customized with the same finishing as that of the door. No compatibility problems were found with the coats tested by AGB. AGB always advises customers to check the resistance of the coat before serial forend cover coating.*
