Apex's decorative architectural brackets are manufactured from a blend of high performing impact resistant polystyrenes, to offer the look and feel of finely finished timber but with all of the weatherability and strength properties required to make the best gallow brackets on the market. Apex extrudes it's own profile and fabricates the brackets to any required design, thus ensuring the best quality and most cost efficient product available.

These fully assembled, durable brackets can be used under door canopies and bay windows to give a long lasting stylish finish and are available in the standard designs shown over leaf or to any design you may require.
