

An XL Joinery guide to internal door hinges

Hinges are a functional component in how an internal door operates, allowing the door to swing open and close. They are fixed to the door and to the door frame.

The type of hinge you require depends on the type of door you are installing, the weight, clearance space and location.

The below guide is a hinge recommendation for XL Joinery internal doors.:

		Hinges per door	Type of hinge	Availability
 Standard door hinge	Standard door	3	3" butt hinge	Available as standard in XL Joinery handle packs
	Glazed door	3	3" butt hinge	Available as standard in XL Joinery handle packs
 Fire door hinge	Standard fire door	3	4" butt hinge	Available as standard in XL Joinery handle packs
	Glazed fire door	3	4" butt hinge	Available as standard in XL Joinery handle packs
 Bi-Fold hinge	Bi-Fold door	2	Concealed	Pre-fitted to all XL Joinery bi-fold doors
 Barn door hinge	Ledged & Braced door	2	T-Hinge	Please email

Some bespoke Fire Door sizes may require 4no. Any requirement for 4no hinges will be noted on your drawing for sign off.
